Hackathon

👤 **Instructor: Yasin Ehsan** | Team Collaboration | Problem Solving | User Feedback

Your Task:

- Build a project with your team based on your track. Be specific in what you would like to build, it can be a personal lifestyle tool, AI tool, a tool for businesses, or a clone of an existing product.
- The goal at the end of the Hackathon is to acquire 20-100 users by posting on LinkedIn, TikTok, and/or Instagram.
- You should track user acquisition and engagement metrics through services like Google Analytics, Posthog, or Hotjar.
